In the Specification

Please replace the paragraph beginning at page 2, line 3, with the following:

Referring now to FIG 1, one common arrangement of providing console device access to server appliances in a network 100 is depicted. As depicted, a plurality of server appliances 102 are connected to each other via a network medium such as an Ethernet connection. In addition, each server appliance 102 includes a connection for a keyboard, mouse, and video terminal (or other suitable display unit).
